

The Next To Go Odds screen offers comprehensive coverage of the field's win prices, place prices, interstate comparison prices to inductate value bets, pool totals and a graphical indication of the most recent price movement for each runner. The screen can handle up to 24 runners by splitting the screen into 2 alternating frames when more than 12 runners are present.

2nd 3rd & 4th Next to go

The 2nd 3rd & 4th Next to go channels show the same format as the Next To Go channel but show the 3 races following the next to jump in the same detail.

This eradicates the need for a screen per meeting in what is an ever-growing list of events punters can bet on. Your punters can see at least the next 4 races to jump all the time.

When more than 12 runners are present, the screen will alternate between the first and second halves of the field
