

LiveOddsTV has comprehensive coverage of all results and utilises 2 formats on the one channel. Firstly it rolls over through results for the 5 most recent events with full details and then switches to a list of the last 14 races with brief win order information for each, colour coded to your state's colour scheme. Result areas auto-size to handle complex dead heats if needed or make the most of the screen area by sizing fonts to suit when a sparse result is shown. LiveOddsTV result service is colourful and compelling but at the same time offers super clear readable results.
